

**New facilities. New equipment. New heights.  
Our move is your gain.**

# We move, you benefit.

**In May 2008, Ampersand Printing is moving.  
But all you'll notice is us shifting into a higher gear.**

Our move to 999 York Road completes a process long underway – a move to become one of the first fully automated print facilities in North America. Ampersand's progress has already been recognized with the international CIPPI award for the **biggest improvement in efficiency and customer responsiveness as a result of process automation**. From estimating through printing, finishing and delivery, our workflow is governed by the industry standard, computer-driven JDF (Job Definition Format). This means that you benefit from unsurpassed print quality and flexibility.

123 Woolwich Street

## Passion & precision.

**This move means more than just a change of scenery.  
Our passion for printing will be integrated with a fully automated facility.**

**A**  
999 York Road

### **No surprises.**

Your jobs will be brought to press faster with rules-based software that fully automates preflight and avoids delays. Each proof is produced to exacting specifications and **calibrated to your specified paper type**. The days of unpleasant surprises at the proofing stage are over.

### **Printing with flying colours.**

A 10-micron Staccato™ screen gives unsurpassed detail and makes your product shine. Ampersand's new 40-inch, six-colour press with an aqueous coater prints with **the highest quality in the industry** on a wide variety of substrates, from onion skin to 40 point board – at competitive rates.

### **Faster across the finish line.**

More options and accuracy – that's what our automated finishing system gives you. More in-house equipment means more control over quality and timing. Our **new 40-inch folder** completes even the most complicated folds – including double gates – in record time.

### **Wind powered & easy on trees.**

Our state-of-the-art equipment is **bullfrog-powered** by wind, water and other green energy. You can spec **FSC-certified paper** from well-managed forests. Plus, we use ecological chemistry management and create less waste through automation. So the planet (and your conscience) will be cleaner.

**Benefit now.**
